

The AI-Powered Smart Building Platform

aida™ by, Building AI Solutions, is the next-generation smart building AI agent that seamlessly integrates artificial intelligence, IoT, and predictive analytics to revolutionize building management. Designed for commercial offices, hospitality, education, healthcare, and manufacturing, aida™ delivers measurable results in energy efficiency, occupant comfort, and operational excellence

Key Benefits

Maximize Occupant Comfort

aida™ automates lighting, climate control, and personalized settings, adapting in real time to occupancy and environmental changes. This ensures optimal comfort for every occupant, every moment

Predictive Maintenance

Advanced analytics and IoT data allow aida™ to predict system failures before they occur, reducing downtime, extending equipment life, and lowering maintenance costs through proactive interventions

Optimize Energy Usage

AI-driven automation and predictive analytics reduce energy consumption by up to 30%. aida™ intelligently manages PoE devices, HVAC, and lighting, minimizing waste while maintaining peak performance

Seamless Integration

Easily integrates with existing building systems and IoT devices, providing a unified platform for streamlined, intelligent, and cost-efficient building management

aida™ sets itself apart by combining cutting-edge AI, real-time data, and seamless integration, delivering a smarter, more adaptive, and more sustainable building environment compared to traditional BMS platforms. Competing solutions like Honeywell Niagara, Yardi Pulse, and MRI Software offer robust building management but often lack the advanced automation, predictive intelligence, and occupant-centric features that Aida delivers out of the box

Choose Aida™ for:

- True AI-powered automation and analytics
- Rapid integration with any building system or IoT device
- Personalized occupant comfort and operational efficiency
- Scalable, flexible plans for any property type
- Significant, measurable energy and cost savings

aida™ is the future-ready choice for organizations seeking transformative results beyond what legacy BMS systems can offer.

Industries Served

- Corporate Offices & Multi-Use Commercial
- Manufacturing Facilities
- Educational Institutions
- Hospitality
- Healthcare Facilities

Experience a smarter, more sustainable, and more comfortable building environment. Discover how Aida™ can transform your facility today.

aida™ Smart Building Platform 2025 Pricing Overview

Pricing That Fits Your Goals and Budget

Choose the plan that fits your facility's needs and budget. All Basic and Pro plans include core modules: Lighting, Shade Automation, PoE Desk (Sit/Stand), HVAC, Environmental Sensors, Access Control Integration, and Fault Managed Power.

Modular Plan \$250/Device/Yr.

Lighting: Manual Control Only
Shade Automation: Manual Control Only
PoE Desk (Sit/stand): Monitor Only
Environmental Sensors: Monitor Only

aida Basic \$0.49/Sqft/Yr.

Manual Control, Time Clock Scheduling
Manual Control, Time Clock Monitor & Basic Control
Power Stats & Alerts
Data Visualization, Threshold Alerts
Monitor & Control with Time Clock, BACnet
Not Included- Focus on straightforward controls rather than AI orchestration

aida Pro \$0.99/Sqft/Yr.

AI Automation & Daylight Harvesting
AI-Driven Adjustments- AI Presence-Driven Adjustments & Analytics
Advanced Diagnostics & Predictive Failure
AI Trend Detection & Automation Triggers
Fully Integrated with aida AI
AI-Driven Optimization & Predictive Scheduling- Fully Included-Central brain coordinating all building systems
